

Bishnu Oraon

"I received excellent coaching, and the lecturers' invaluable expertise and experience made my preparation uncomplicated."

My name is Bishnu Oraon. I'm from Chuapara T.E., a village in the Alipurduar District's Kalchini Block. I wanted to take the engineering entrance exam in 2021 after passing my secondary exam. I failed to show up the next year because I wasn't ready. I wanted a coaching program that would give me an excellent level of preparation. Then, one of my friends gave me information about NCSM Foundation who has 52 Centers in West Bengal for JEE & NEET preparation and support the students like us who are interested but unable to take proper preparation due to financial and locational problem under Yogyashree project of Government of West Bengal. I popped into it right away and completed all the steps required. I was finally accepted into the coaching program after being selected for it, because I was raised in a family with little income, the fact that the coaching was free was an enormous benefit for me. I received excellent coaching, and the lecturers' invaluable expertise and experience made my preparation uncomplicated. I was greatly helped in my preparation by the coaching's well-designed entrance exam materials and periodically Mock Test. Additionally, a motivating session was held, which reinforced my belief that I might succeed. I finally took the WBJEE the following year, in 2022, and placed 18th in my category. I'm presently a student in Jadavpur University's B.E. program in information technology.

Bishnu Oraon.
